

## **Safe Drinking Water Act Update for Distribution System and Water Treatment Plant Operators**

*(one day class)*

With many changes to existing rules, and new rules added, this workshop is designed to help operators of water treatment plants to know what actions are required during 2010 to comply with these rules.

- Total Coliform Rule
- Monitoring and Sampling Requirements
- Disinfection Byproducts Control as a Team Effort
- Lead and Copper Rule
- System Security
- Bacteriological Monitoring and Sampling
- Sanitary Surveys for Distribution Systems and Treatment Plants
- EPA Asset Management Software for Water Systems

This class covers those portions of the rules which impact both the water treatment plant and the distribution system. Classes will begin at 8:30 am and end at 4:00 pm. Successful completion of this class will provide six hours of continuing education credit toward any Water Treatment or Distribution System certificate. An additional 6 hours of continuing education credit for water treatment by attending the Safe Drinking Water Act Update for Water Treatment Plant Operators.
