TAUD is offering a new continuing education opportunity for water treatment operators. With social distancing becoming the norm, we developed a 3-hour or 6-hour webinar program for operators. Each webinar will be a different topic that will begin at 12 pm central on the date listed and last until 3 pm central. An operator may choose to complete one Block and receive 3 CE hours or both Blocks A&B to receive 6 CE hours. The operator must attend every presentation in a block and answer the poll questions to receive credit. The presentations will be conducted through Zoom so all an attendee needs to attend this webinar is a smart device including computer, tablet or phone with internet connection.

**Block A**

**Source Water Protection Planning:** The attendee will gain the knowledge of the source water protection rule. They will understand how to develop a source water protection plan. What to look for in a potential containment source, and tools that can be used to protect drinking water sources.

**Sustainability and Contingency Planning:** The attendee will gain the knowledge of how to plan for future disruption in service and ways to keep customers in potable water.

**NPDES Permit for Filter Backwash and Sedimentation basin washout:** The attendee will learn how to apply/reapply for coverage under the states general permit. They will also gain the knowledge of how to handle the waste sludge.
